FORM 8-K

CURRENT REPORT
Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

Date of Report (Date of earliest event reported): June 7, 2011

AMICUS THERAPEUTICS, INC.

(Exact name of registrant as specified in its charter)

Delaware (State or other Jurisdiction of Incorporation)	001-33497 (Commission File Number)	71-0869350 (IRS Employer Identification No.)
6 Cedar Brook Drive, Cranbury, NJ (Address of Principal Executive Offices)		08512 (Zip Code)

Registrant's telephone number, including area code: **(609) 662-2000**

(Former name or former address if changed since last report.)

Check the appropriate box below if the Form 8-K filing is intended to simultaneously satisfy the filing obligation of the registrant under any of the following provisions:

- Written communications pursuant to Rule 425 under the Securities Act (17 CFR 230.425)
 - Soliciting material pursuant to Rule 14a-12 under the Exchange Act (17 CFR 240.14a-12)
 - Pre-commencement communications pursuant to Rule 14d-2(b) under the Exchange Act (17 CFR 240.14d-2(b))
 - Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))
-
-

Item 8.01. Other Events.

On June 7, 2011, Matthew R. Patterson, President and Acting Chief Executive Officer of Amicus Therapeutics, Inc., participated in the Jefferies 2011 Global Healthcare Conference in New York, NY (the "Conference"). A copy of the presentation given by Mr. Patterson at the Conference is attached to this Current Report as Exhibit 99.1.

Item 9.01. Financial Statements and Exhibits.

(d) Exhibits: The Exhibit Index annexed hereto is incorporated herein by reference.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.

Amicus Therapeutics, Inc.

This presentation contains "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995 relating to business, operations and financial conditions of Amicus including but not limited to preclinical and clinical development of Amicus' candidate drug products, the timing and reporting of results from preclinical studies and clinical trials evaluating Amicus' candidate drug products, the projected cash position for the Company, and business development and other transactional activities. Words such as, but not limited to, "look forward to," "believe," "expect," "anticipate," "estimate," "intend," "plan," "would," "should" and "could," and similar expressions or words, identify forward-looking statements. Although Amicus believes the expectations reflected in such forward-looking statements are based upon reasonable assumptions, there can be no assurance that its expectations will be realized. Actual results could differ materially from those projected in Amicus' forward-looking statements due to numerous known and unknown risks and uncertainties, including the "Risk Factors" described in our Annual Report on Form 10-K for the year ended December 31, 2010. All forward-looking statements are qualified in their entirety by this cautionary statement, and Amicus undertakes no obligation to revise or update this news release to reflect events or circumstances after the date hereof.

Slide 5

Amigal for Fabry Disease

Disease Overview

Slide 6

- Lysosomal Storage Disease
- 5,000 – 10,000 patients worldwide
- Fabrazyme® and Replagal® ERTs
current standard of care
- Males and Females
- GL-3 substrate accumulation
- Kidney, Heart and Brain
- Fatal

Worldwide Fabry Market

Current Landscape

Slide 7

- \$800MM in 2011 revenue projected (after shortage resolved)
 - 2010 revenue \$529M
 - 2009 revenue \$625M
- Shortage lowered sales but growth in treated patients continued
- Equal populations of males and females in patient registries
- Ratio of treated males:females was ~50:50 prior to shortage and is 65:35⁴ today
- Significant undiagnosed late onset population⁴

Sources:

1. GENZ presentation at JP Morgan Conference Jan '10 plus extrapolation of Replagal 2009 revenues; forecast doesn't include US approval of Replagal
2. Estimated change in market share driven by global supply shortage
3. Analyst projected CAGR extrapolated based on JP Morgan, AG Edwards, Collins Stewart, SG Cowen and Credit Suisse projections
4. Fabrazyme Registry 2010, FOS Registry 2009, Canadian Registry 2010; Spada et al

Amigal for Fabry Disease

Program Overview

Slide 8

Lead development program
Global collaboration with GSK Rare Diseases

- Small molecule for oral administration
- First in man: 2005
- Cumulative 85+ patient-years of data
- No drug-related serious adverse events and no adverse event trends
- 17 patients remain in Phase 2 extension study
 - 5 patients > 4 years, 12 patients > 3 years
 - Encouraging safety and renal function data
- Phase 3 registration studies ongoing
- First-in-man Phase 2 study of Amigal co-administered with ERT underway

 Amicus
Therapeutics

Amigal for Fabry Disease Phase 3 U.S. Registration (Study 011)

Slide 9

Study Overview

- Randomized, double-blind, placebo-controlled
- 60 patients (males and females)
- 6-month treatment period
- Endpoints:
 - Primary:** $\geq 50\%$ reduction in interstitial capillary GL-3 in kidney biopsy
 - Secondary:** $\geq 50\%$ reduction in urine GL-3
- Enriched patient population

Status Update

- 37 sites initiated globally
- Nearing completion of enrollment
- Final enrollment expected 3Q11

Worldwide Fabry Market

Projected Future Growth

Slide 12

Assumptions

- Significant market growth expected from increased diagnosis and treatment of females and late-onset males
- Higher percentage of mutations addressable by Amigal in females and late-onset males
- Additional market growth driven by availability of an oral agent

Sources:

1. Analyst projected CAGR extrapolated based on JP Morgan, AG Edwards, SG Cowen, Collins Stewart and Credit Suisse projections
2. Addressable mutation percentages are estimates

Amigal for Fabry Disease

Complete Market Opportunity

Opportunity to Address ***ALL*** Fabry Patients Regardless of Mutation

Monotherapy

Oral Amigal

Chaperone endogenous enzyme from ER to lysosome

Potential Advantages

- Oral administration
- Broad tissue distribution
- Chemical synthesis

Amigal Monotherapy
(addressable mutations)

Amigal-ERT Co-Administration
(non-addressable mutations)

Co-Administration

Oral Amigal, IV ERT

Chaperone ERT from circulation to lysosome

Potential advantages

- Increased tissue uptake
- Reduced immunogenicity
- Reduced dose/frequency

**Extrapolations based on HEK responsiveness and FOS registry data*

AT2220 for Pompe Disease

Disease Overview

Slide 19

- 5,000 – 10,000 patients worldwide
- Leads to heart and respiratory failure, muscle degeneration
- >90% of patients have later onset disease
- 2010 revenue of ~\$400MM (Myozyme/Lumizyme)
- Glycogen accumulation
 - Heart, skeletal muscles, liver, and nervous system
- Current standard of care: ERTs
 - Moderate clinical benefit
 - Immunogenicity
 - Black box warning for anaphylaxis

Improving ERT for Pompe Disease

Preclinical Data: AT2220 Co-Administered with Myozyme

Slide 20

Amicus plans to perform a Phase 2 trial of AT2220 co-administered with ERT based on encouraging preclinical data

Expansion into Diseases of Neurodegeneration: Link to Lysosomal Storage Disorders

Slide 22

Pharmacological chaperones for genetically defined sub-populations

- Parkinson's disease
 - Link to GCase enzyme deficient in Gaucher disease
 - Funded in part by grant from Michael J. Fox Foundation

- Alzheimer's disease
 - Link between lysosomal dysfunction and neurodegeneration
 - Funded in part by grant from Alzheimer's Drug Discovery Foundation

Pharmacological Chaperones for Parkinson's Established Link to Gaucher Disease

Slide 23

Mutations in GCase gene (*GBA*) considered most common genetic risk factor for Parkinson's Disease

- Gaucher carriers¹
 - 5x more prevalent in Parkinson's disease population
- Gaucher patients²
 - 20-fold risk for developing Parkinson's disease
- Lead pharmacological chaperone: AT3375
 - Targeting GCase for Parkinson's disease
 - Completing preclinical studies, including IND-enabling studies, in 2H11
 - Potential to modify course of disease

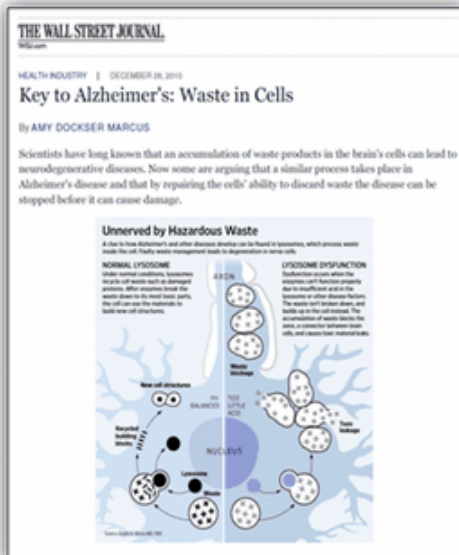

¹Sidransky, New Engl J Med, 2009 Oct 22; 361(17): 1651-61

²Bultron, Journal of Inherited Metabolic Disease, 2010, 33(2):167-173

Pharmacological Chaperones for Alzheimer's Link to Lysosomal Storage Disorders

Slide 24

Researching novel approaches for
2 distinct targets and patient populations

- Genetic (familial) Alzheimer's disease
 - Presenilin 1 target
 - Missense mutations
 - 50,000-150,000 patients in U.S.
 - Early pre-clinical POC established
- Sporadic Alzheimer's disease
 - Lysosomal enzyme target
 - ~4.5MM patients (U.S.)

*Partnership with GSK Rare Diseases
and Financial Outlook*

At the Forefront of Therapies for Rare Diseases™

Strong Partnership with GSK Rare Diseases

Exclusive Worldwide Rights for Amigal

"Amicus' scientific and clinical expertise in human genetic diseases is among the best in the industry, and we are pleased to be collaborators and investors in this exceptional company."

- Marc Dunoyer, Global Head, GSK Rare Diseases

Amicus Financial Strength

Slide 27

GSK partnership allows Amicus to fully invest its pipeline while maintaining cash reserves

- Cash balance (3/31/11): \$93.8MM
- 2011 Projected Net Spend: \$45-55MM
- Projected cash runway: through anticipated Amigal U.S. commercial launch (net of anticipated GSK collaboration payments)

Amicus: Building Shareholder Value in 2011

Recent and Expected Milestones

Slide 28

Recent Milestones

- ✓ Ph 2 Amigal extension data in Fabry Patients out 3-4 years
- ✓ 1st patient in Ph 2 Amigal-ERT co-administration study in Fabry disease
- ✓ Sites opened for Amigal Ph 3 EU study in Fabry disease
- ✓ Ph 2 AT2220-ERT co-administration moving forward in Pompe disease

Upcoming Milestones

- Complete enrollment in Amigal Ph 3 US Study in 3Q11
- 1st patient in Amigal Ph 3 EU study in 2Q-3Q11
- Phase 2 Amigal-ERT co-administration data in 2H11
- 1st patient in Ph 2 AT2220-ERT co-administration study in 3Q11
- Late-stage preclinical POC, including IND-enabling activities, for AT3375 in Parkinson's in 2H11

Amicus: Building Shareholder Value in 2011

Value Proposition

Slide 29

- Leader in rare diseases – validated by strong commercial partner GSK
- Robust development pipeline and technology platform
- ~ \$250MM market capitalization
- ~ \$93.8MM cash
- Multiple near-term milestones
